SETTING UP YOUR DISPLAY

1 Place frame with red studs facing front.
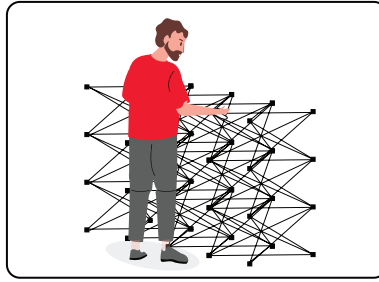

2 Grasp two top centre hubs and lift frame open to shoulder height. Handle frame at hubs only.
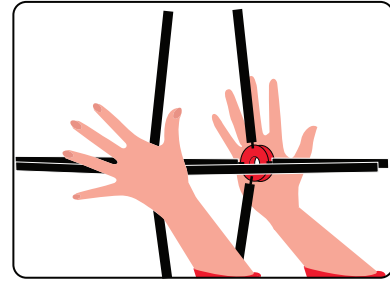

3 Press front and back hubs in the centre of the frame until Instand locks into position. (Front and back hubs do not meet.)
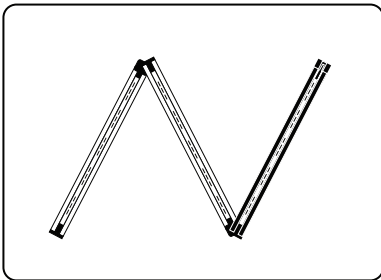

4 Unfold connected strut ensuring magnets are facing the same direction...
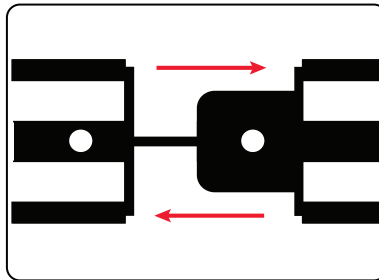

5 ...and connect bottom two sections by joining as illustrated.
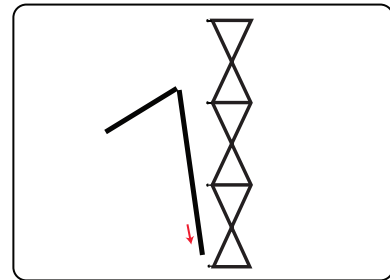

6 Slide bottom of connected strut onto the red stud at the bottom of the frame.
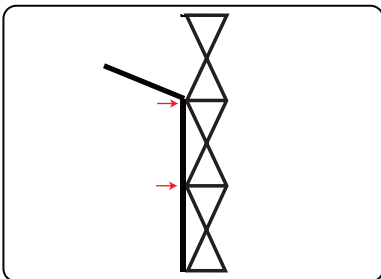

7 Snap next two connectors onto studs on frame.
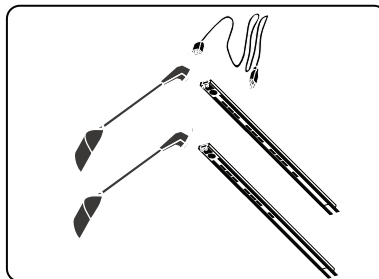

8 Attach lights to top of struts. Swivel fixtures to adjust position. Run cord behind display.
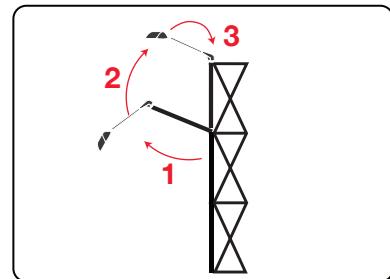

9 Rotate top section of strut up and slide down onto top stud.
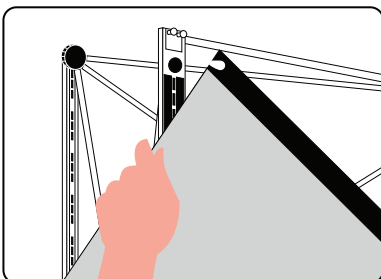

10 Hang all top panels and full size panels first. Lift onto studs on top of frame. Hook one side then the other. Gradually release downward to bond magnets.

11 Bow endcaps and lift onto studs on top of both sides of frame. For hinged panels hook one side then the other. Slide hands along length of panel to bond magnets.
